

# Glass Manifestation

## Offering & Options

## Plain Frosted Manifestation

### 3M Scotchcal Crystal Film Series 5525

3M Scotchcal Crystal Film Series 5525 offer a way to create distinctive designs on glass. They are affordable, versatile and stylish, for use in creating medium-term window graphics and internally illuminated displays on flat, clear surfaces. They can be used for interior and exterior applications.

### Grafitack Sandblast-Effect Film TR100 (lighter)

The Grafitack sandblast-effect film with reference TR100 is a soft cadmium-free monomeric calendered PVC, provided with a pressure-sensitive permanent acrylic adhesive. This adhesive is protected by a high-quality silicone paper. A good recognizability is guaranteed by the blue print on the material's backing paper.

## Printed Clear Manifestation

### 3M Scotchcal Clear View Graphic Film 8150 Transparent

A highly transparent printable cast film (50 µm) for glass applications. Unprinted areas allow perfectly clear view through the glass. Images with sophisticated details don't need contour cutting anymore; possibility to print special effects like dusted/frosted by using white ink. One-Way-Vision effect without using punched films. Up to 7 years durability.

## Combination of Films

Digitally printed optically clear film is applied to the glazing external surface. A cut out frosted vinyl silhouetting the design is applied to the internal surface. This creates an image with more depth & more privacy for the office without obstructing the light.

## Combination of Films

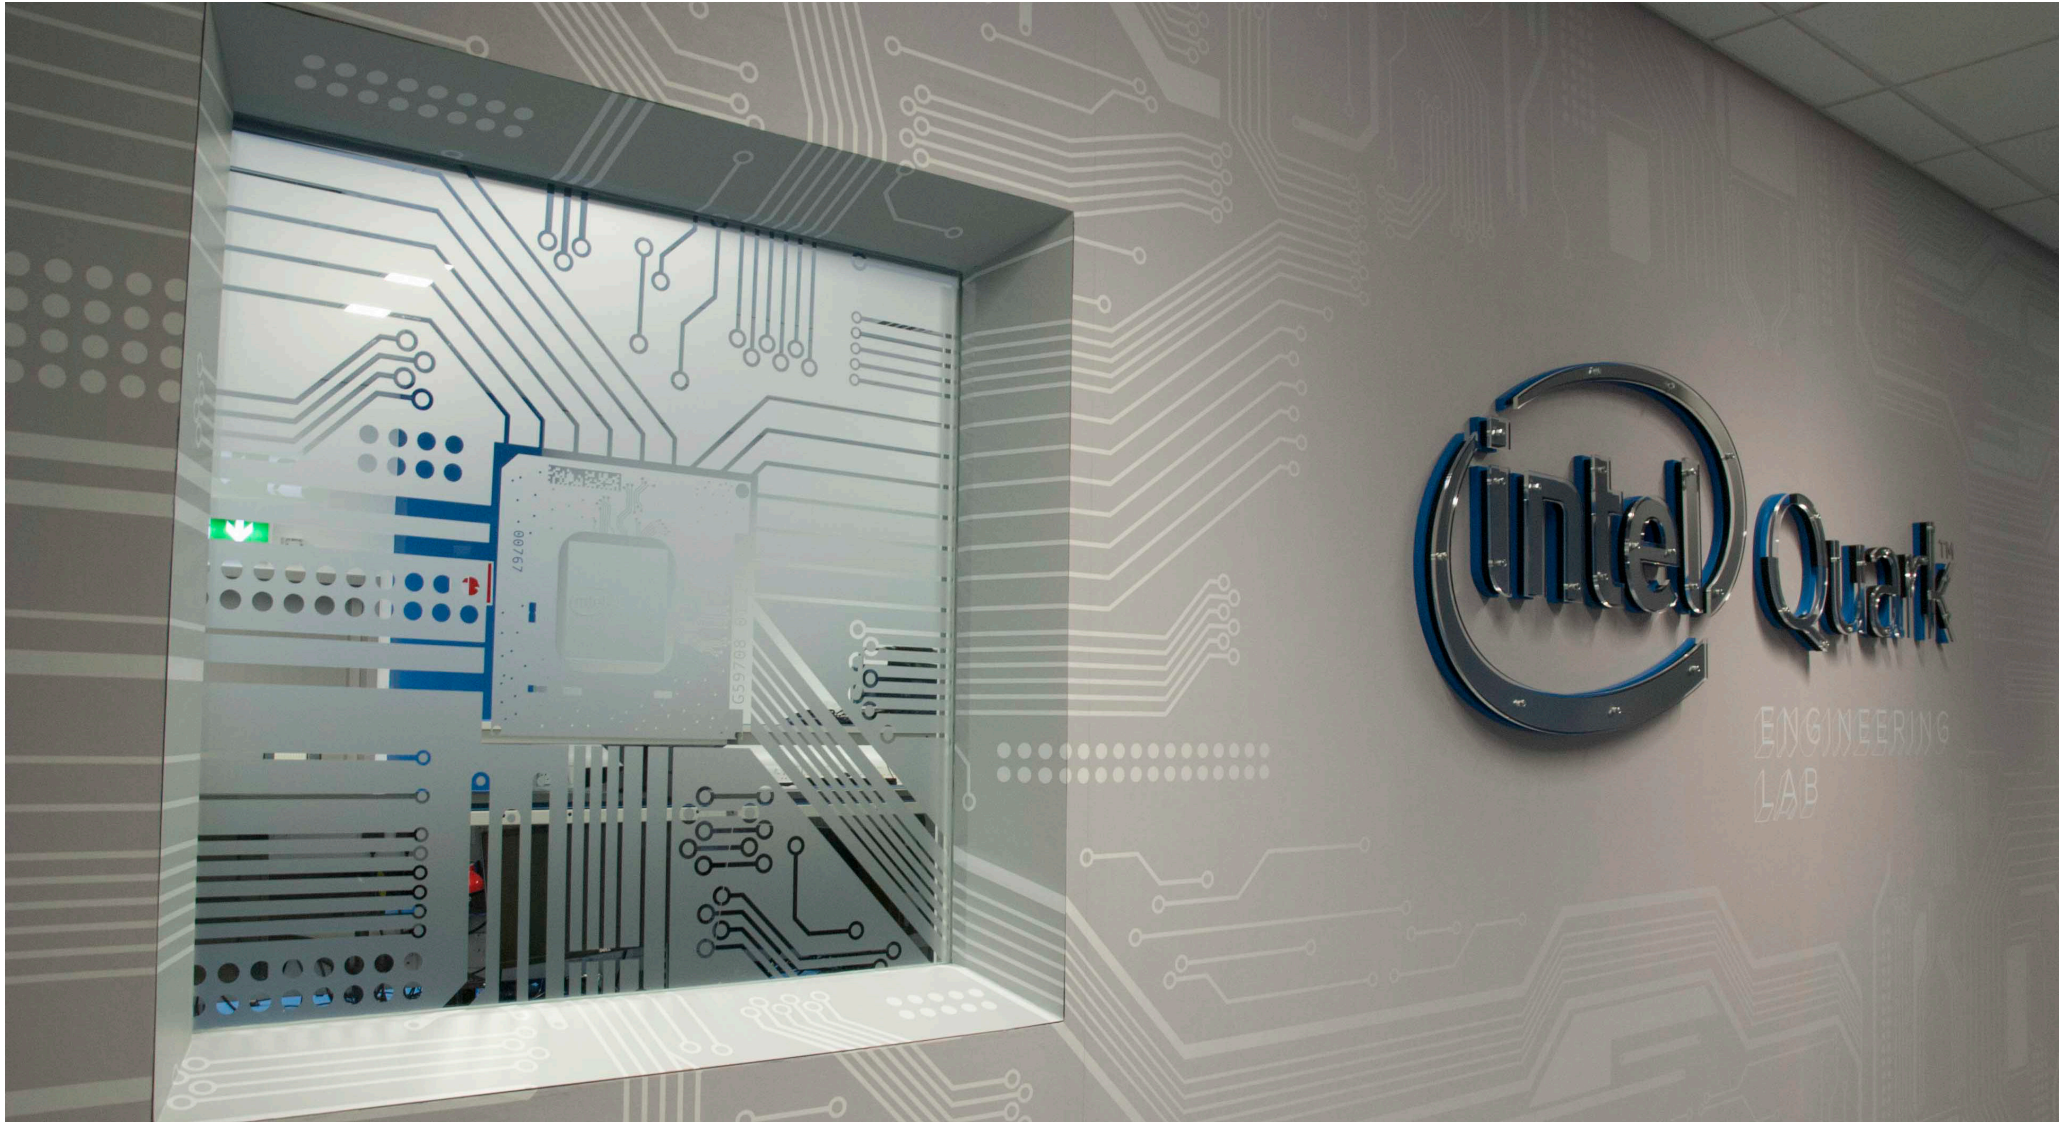

## Combination of Films

Vision produced and installed architects Camenzind Evolution's design for Google's European HQ. A combination of printed optically clear film installed to the external glazing and cut out manifestation applied internally.
